10.08 - Area gripper

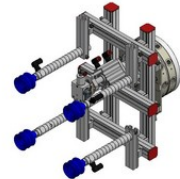

Crate Gripper

Bag Gripper

10.61 - Water gallon gripper

2.12 - Removal gripper
EOAT - 1 - fold

Product description

AGS ready-made grippers are turnkey, fully assembled and documented EOAT solutions that mount directly on the robot wrist and can be put into operation immediately. Standard versions include take-out, insert-loading/take-out, transfer and sensor-equipped types. For special requirements, carbon-frame, lightweight or cobot grippers can also be ordered at short lead times.

Technical specifications

Feature	Value / description
Take-out	Part removal + placement on the conveyor
Insert-loading / take-out	Insert loading + part removal
Transfer	Movement between cavities
Sensor-equipped	With presence and quality control
Special – carbon	Minimum weight, high rigidity
Design lead time	Standard: 1–2 weeks Special: 3–6 weeks

Typical applications

- › Automated part removal from injection moulding machines
- › Insert moulding – insert loading and part removal at the same time
- › 2K technology, transfer between multi-cavity moulds
- › 100% sensor-based verification within the cycle
- › Cobot applications and fast linear units (special)

Documentation and CE conformity:

Standard grippers come with photo documentation + technical drawings. Full CE conformity documentation is also available on request.
