NDZ – Centre-Placing Articulated Conveyor

The most versatile DMD type – into containers and boxes, precisely in the centre

Characteristics

Type code	NDZ
Layout	Two freely adjustable sections – from flat to steep
Main function	Placing parts in the centre of a container / onto a workbench
Belt surface	Any belt type
Mobility	On wheels
Sectors	Plastics processing, recycling, food/packaging
Manufacturing	Custom-sized, to customer specification

Typical applications

- Into deeper containers and shipping boxes – in the centre, with minimal drop height
- Damage-free placement of delicate products
- Food and packaging industry with an FDA belt

Why choose it?

- ✓ Reduced drop height: parts land in the container without damage
- ✓ The angle of the upper section is freely adjustable – endless configurations
- ✓ Available with any belt type – the most versatile DMD type
- ✓ Can also be used on food industry and packaging lines
