

CIS

NI – Inclined Conveyor

Steep incline – for feeding sprue granulators and filling containers

Characteristics

Type code	NI
Layout	Steeply inclined, ascending
Mobility	On wheels / on a fixed support (large models)
Belt surface	Smooth PU, PU supergrip, Spondaflex (cleated)
Optional	A spiral or cylindrical sprue separator can be fitted
Sectors	Plastics processing, recycling
Manufacturing	Custom-sized, to customer specification

Typical applications

- ▶ Conveying sprues directly into the sprue granulator
- ▶ Lifting granules and regrind into a container
- ▶ Transferring reclaimed material to the next processing stage

Why choose it?

- ✓ With a Spondaflex belt: slide-back-free conveying on steep inclines
- ✓ Can be combined with a spiral / cylindrical separator – conveys and separates
- ✓ Small models movable on wheels – flexible positioning
- ✓ Custom incline angle and height to match the container / granulator opening
