

LIAD AccuTrack

Gravimetric screw feeder – SmartClean · real-time monitoring

70 kg/h

Max. dosing throughput

Description

The AccuTrack is a state-of-the-art gravimetric feeder for injection moulding machines and extrusion lines. With real-time raw material consumption monitoring, SmartClean material changes and a compact design, it meets the needs of smart, automated production. It integrates seamlessly into existing production lines.

Applications

- **Injection moulding machines:** masterbatch dosing with real-time consumption tracking
- **Extrusion lines:** material consumption data for production tracking
- **Smart manufacturing:** Industry 4.0 integration, automated plant
- **Fast material changes:** SmartClean – a single push of a button, safe and fast

Key features

- **Real-time raw material consumption monitoring:** production statistics, material cost analysis
- **SmartClean function:** fast and safe material changes at the push of a button
- **Dual level sensor:** the production process does not stop due to lack of material
- **Dosing throughput of up to 70 kg/h**
- **Integrated venturi loader:** self-contained system, no external loading unit
- **Compact neckpiece adapter:** easy to mount on existing machines
