

Mini Double Shaft Shredder

Mini double-shaft shredder | Shredder – small-scale

Product description

The Mini Double Shaft Shredder is the small-scale version of double-shaft shredding technology. Its compact size and lower capacity make it ideal for smaller production lines and waste collection yards. The main frame is welded from high-quality steel plate with stress-relief treatment, and the blade configurations can be tailored to the material in question.

Model range

Model	Feed opening (mm)	Machine dimensions (mm)	Weight (kg)	Motor
HN-M180A	300×180	1 200×600×1 000	320–340	4 kW
HN-M280	300×280	1 400×600×1 000	520	5,5+5,5 kW
HN-M400A	400×400	1 200×600×1 200	680	15 kW
HN-M500	400×500	1 900×600×1 200	1 200	15+15 kW
HN-M600	400×600	2 200×600×1 200	1 500	15+15 kW

Applications

- Shredding of plastic waste from small and medium-sized enterprises (bottles, films, mouldings)
- Pre-shredding of cable and wire waste upstream of a copper recovery line
- Size reduction of paper, cardboard and packaging materials
- Small-scale pre-shredding of electrical and electronic waste
- Processing of smaller metal waste (cans, assembly offcuts)
